

PRODUCT SHEET

BT-PC-23A

Industrial Portable Evaporative Air Cooler

Features

- High quality Honeycomb Pads for high water absorption & Optimal cooling.
- High quality, sealed & 100% copper wired Motor.
- UV Stabilizer Engineering Plastic.
- Strong Nylon 3 Blades propeller dynamically balanced for Optimal Airflow & Low Noise.
- Mechanical Water Inlet & Manual Water Inlet.
- Digital LCD Controller.
- Automatic Left/Right and Manual Up/Down Swing Features for Covering large Area.
- Heavy-duty & Locking Brake 4 Caster Wheels for Easy Move and Settle.
- High-density Pre-dust Filter for Capturing Large Particles such as Dust, Lint, Organic Material, Insects, etc.
- Large Water-reservoir to run cooler whole day in single Refilling.
- Water level sensor to protect water pump when cooler is out of water.

The BT-PC-23A commercial and industrial portable evaporative air cooler with their various functions in one unit. Our BT-PC-23A commercial and Industrial portable evaporative air cooler can be use indoor and outdoor areas. Since these air coolers are portable, with strong wheels & brakes, you can easily move them from one room to another.

The BT-PC-23A commercial and industrial portable evaporative air cooler can be used as an air cooler, air purifier, fan, and humidifier. It can also purify the air and make it clean.

It can improve the air quality by removing pathogens from the environment. The air of the area becomes healthy and free from airborne diseases.

BT-PC-23A

Industrial Portable Evaporative Air Cooler

Technical Specifications

Product Code	BT-PC-23A
Airflow	23500m³/h
Voltage	220-240V
Power	1100W
Covering Area	150-200m²
Water Tank	96L
Noise	60/66/70dbA
Frequency	50-60Hz
Fan Speed	3 Speeds
Outer Body	ABS Plastic
Pre-dust Filter	Yes
Controller	LCD + Remote
Dimension	1120x700x1650mm
Weight	70Kg
Origin	China

Applications

Airflow Distance
