

PRODUCT SHEET

BT-PC-703

Industrial Portable Evaporative Air Cooler

Features

- High quality Honeycomb Pads for high water absorption & Optimal cooling.
- High quality, sealed & 100% copper wired Motor.
- UV Stabilizer Engineering Plastic.
- Strong Nylon 3 Blades propeller dynamically balanced for Optimal Airflow & Low Noise.
- Mechanical Water Inlet & Manual Water Inlet.
- Digital LCD Controller.
- Automatic Left/Right and Manual Up/Down Swing Features for Covering large Area.
- Heavy-duty & Locking Brake 4 Caster Wheels for Easy Move and Settle.
- High-density Pre-dust Filter for Capturing Large Particles such as Dust, Lint, Organic Material, Insects, etc.
- Large Water-reservoir to run cooler whole day in single Refilling.
- Water level sensor to protect water pump when cooler is out of water.

The BT-PC-703 commercial and industrial portable evaporative air cooler with their various functions in one unit. Our BT-PC-703 commercial and Industrial portable evaporative air cooler can be use indoor and outdoor areas. Since these air coolers are portable, with strong wheels & brakes, you can easily move them from one room to another.

The BT-PC-703 commercial and industrial portable evaporative air cooler can be used as an air cooler, air purifier, fan, and humidifier. It can also purify the air and make it clean. It can improve the air quality by removing pathogens from the environment. The air of the area becomes healthy and free from airborne diseases.

BT-PC-703

Industrial Portable Evaporative Air Cooler

Technical Specifications

Product Code	BT-PC-703
Airflow	25000m³/h
Voltage	220-240V
Power	850W
Covering Area	250m²
Water Tank	170L
Noise	dbA
Frequency	50Hz
Fan Speed	Stepless Speed
Outer Body	ABS Plastic
Pre-dust Filter	NIL
Controller	Industrial Controller
Dimension	1320x690x1720mm
Weight	100Kg
Origin	Taiwan

Applications

Airflow Distance
