

PRODUCT SHEET

BT-PC-70H

Industrial Portable Evaporative Air Cooler

Features

- High quality Honeycomb Pads for high water absorption & Optimal cooling.
- High quality, sealed & 100% copper wired Motor.
- UV Stabilizer Engineering Plastic.
- Strong Nylon 3 Blades propeller dynamically balanced for Optimal Airflow & Low Noise.
- Mechanical Water Inlet & Manual Water Inlet.
- Digital LCD Controller.
- Automatic Left/Right and Manual Up/Down Swing Features for Covering large Area.
- Heavy-duty & Locking Brake 4 Caster Wheels for Easy Move and Settle.
- High-density Pre-dust Filter for Capturing Large Particles such as Dust, Lint, Organic Material, Insects, etc.
- Large Water-reservoir to run cooler whole day in single Refilling.
- Water level sensor to protect water pump when cooler is out of water.

The BT-PC-70H commercial and industrial portable evaporative air cooler with their various functions in one unit. Our BT-PC-70H commercial and Industrial portable evaporative air cooler can be use indoor and outdoor areas. Since these air coolers are portable, with strong wheels & brakes, you can easily move them from one room to another.

The BT-PC-70H commercial and industrial portable evaporative air cooler can be used as an air cooler, air purifier, fan, and humidifier. It can also purify the air and make it clean. It can improve the air quality by removing pathogens from the environment. The air of the area becomes healthy and free from airborne diseases.

BT-PC-70H

Industrial Portable Evaporative Air Cooler

Technical Specifications

Product Code	BT-PC-70H
Airflow	7000m³/h
Voltage	220-240V
Power	560W
Covering Area	40-50m²
Water Tank	50L
Noise	55dbA
Frequency	50Hz
Fan Speed	3 Speeds
Outer Body	ABS Plastic
Pre-dust Filter	Yes
Controller	Knob Controller
Dimension	720x720x300mm
Weight	Kg
Origin	China

Applications

Airflow Distance
