

Centrifugal Industrial Air Curtain

As a manufacturer of high-quality air curtains, we are proud to introduce our latest product, the 380V Air Curtain. This innovative technology is built with advanced features that make it the perfect solution for businesses and commercial settings. If you are looking to create an air barrier that helps keep your indoor space comfortable and clean while reducing your energy use and costs, then this product is perfect for you.

Our 380V Air Curtain is designed to produce a blast of air that can create an air barrier between two spaces. This air barrier is an important tool for creating a comfortable indoor environment and maintaining air quality. When installed at the entrance of a building or room, the air curtain works to separate the outdoor environment from the indoor environment, keeping out pollutants, dust, and insects.

- All metal spraying with better fire prevention, corrosion resistance performance.
- It is designed as high wind speed, high wind pressure and high air volume. Thus it is applicable to factory, warehouse and other locations requiring high wind speed and air pressure.

Turbocharging design

Perfect for Warehouses

Asynchronous Motor

The motor adopts pure copper wire and high quality ball bearing

Model	Size (mm)	Voltage (V)	Freq (Hz)	Power (W)	Inst. Height (m)	Air Speed (m/s)	Airflow (m³/h)	Noise (db)	Weight (Kg)	Dimension (mm)
